

AWS Certified Database – Specialty

The AWS Certified Database – Specialty (DBS-C01) exam is intended for individuals who perform a database-focused role. This exam validates a candidate's comprehensive understanding of databases, including the concepts of design, migration, deployment, access, maintenance, automation, monitoring, security, and troubleshooting.

4P Advisory Services

Who should attend?

AWS Certified Database – Specialty is intended for individuals with experience and expertise working with on-premises and AWS Cloud-based relational and non-relational databases.

Before you take this exam, we recommend you have:

- Five years of experience with common database technologies
- Two years of hands-on experience and expertise working with on-premises and AWS Cloud-based relational and NoSQL databases
- Ability to understand and differentiate the key features of AWS database services
- Ability to analyze needs and requirements to design and recommend appropriate database solutions by using AWS service

Benefits

Apply database concepts, database management, and data modeling techniques.

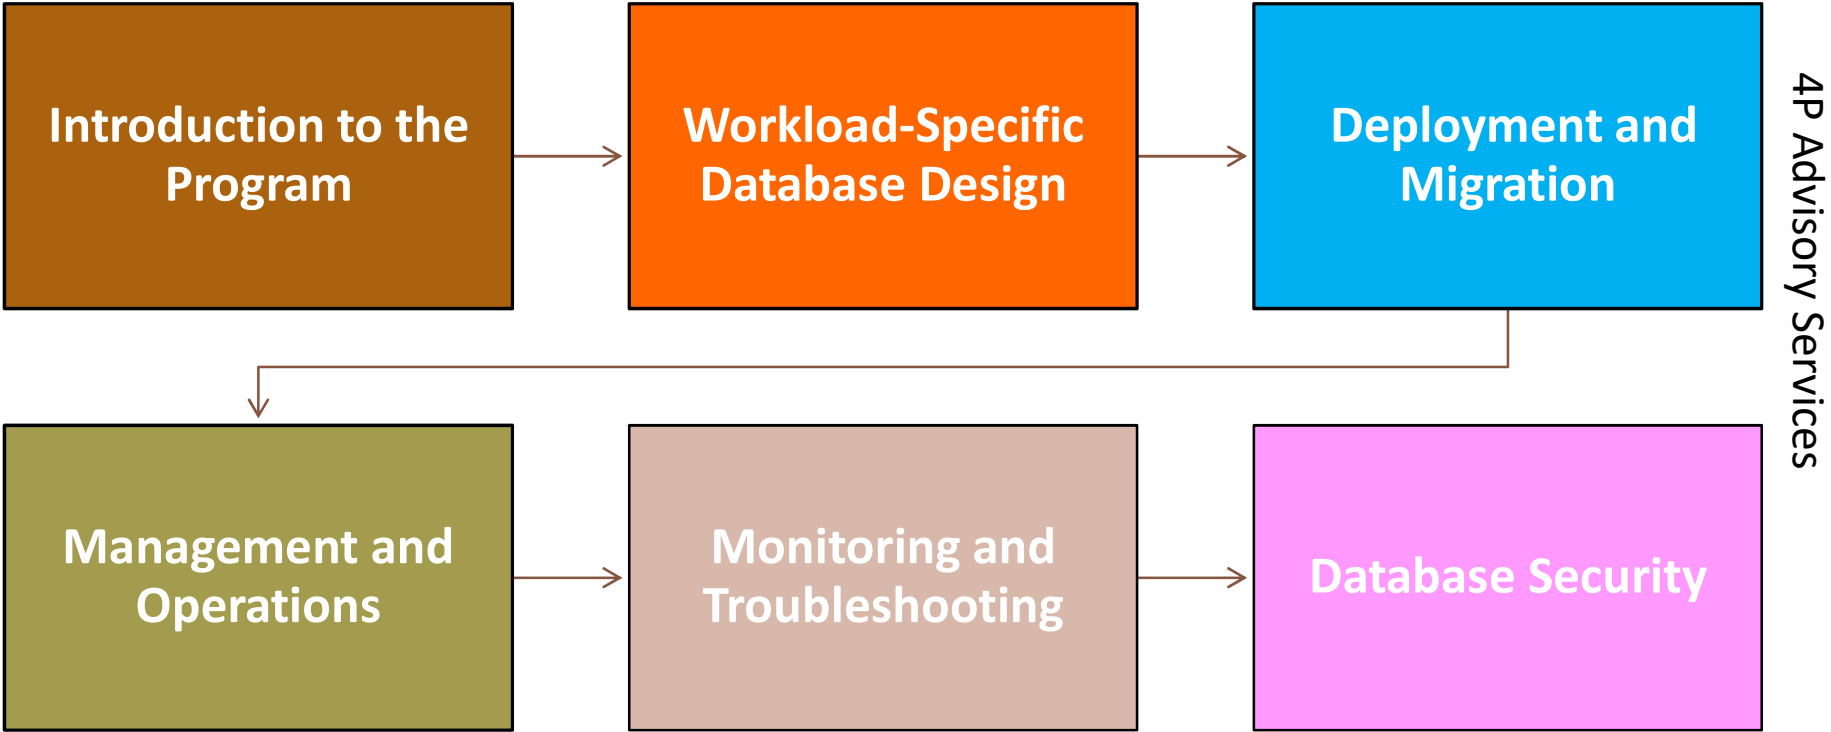

Evaluate hosting databases on Amazon EC2 instances.

Examine how the design criteria apply to each service.

Apply management principles based on the unique features of each service.

Course Outline

Prerequisites for the EXAM

AWS recommends having multiple years of experience with AWS and Database technologies (relational and non-relational) prior to taking this certification. There are no pre-requisites for this certification. However, it will be a great idea to complete one of the other Associate level certifications, such as AWS Solution Architect Associate or AWS Developer Associate, before taking this exam. The Database Specialty certification assumes a good knowledge of the foundational services on AWS.

Exam Details

- Number of questions: 65 questions, either multiple choice or multiple response.
- Exam duration : 180 mins
- Exam Fee : 300 USD
- Delivery method: Pearson VUE testing center or online proctored exam.
