

Cisco Certified Network Professional

CCNP certification is one of the more advanced network certification. The majority of the CCNP modules are very relevant to the networks of service providers who deal with remote access, switching, troubleshooting, and low- and high-speed Internet challenges. CCNP certification is responsible for making major and valuable contributions to an individual's skill set.

Who should attend?

The CCNP certification is appropriate for those with at least one year of networking experience who are ready to advance their skills and work independently on complex network solutions. Those who achieve CCNP have demonstrated the skills required in enterprise roles such as network technician, support engineer, systems engineer or network engineer. Individuals who possess their CCNA certification, are currently working with Cisco equipment, and are interested in obtaining their CCNP certification or furthering their knowledge of Cisco technologies.

Benefits

Acquire full understanding of basic and advanced concepts of **VLAN, Inter-VLAN routing , IPv4 addressing and IOS licensing**

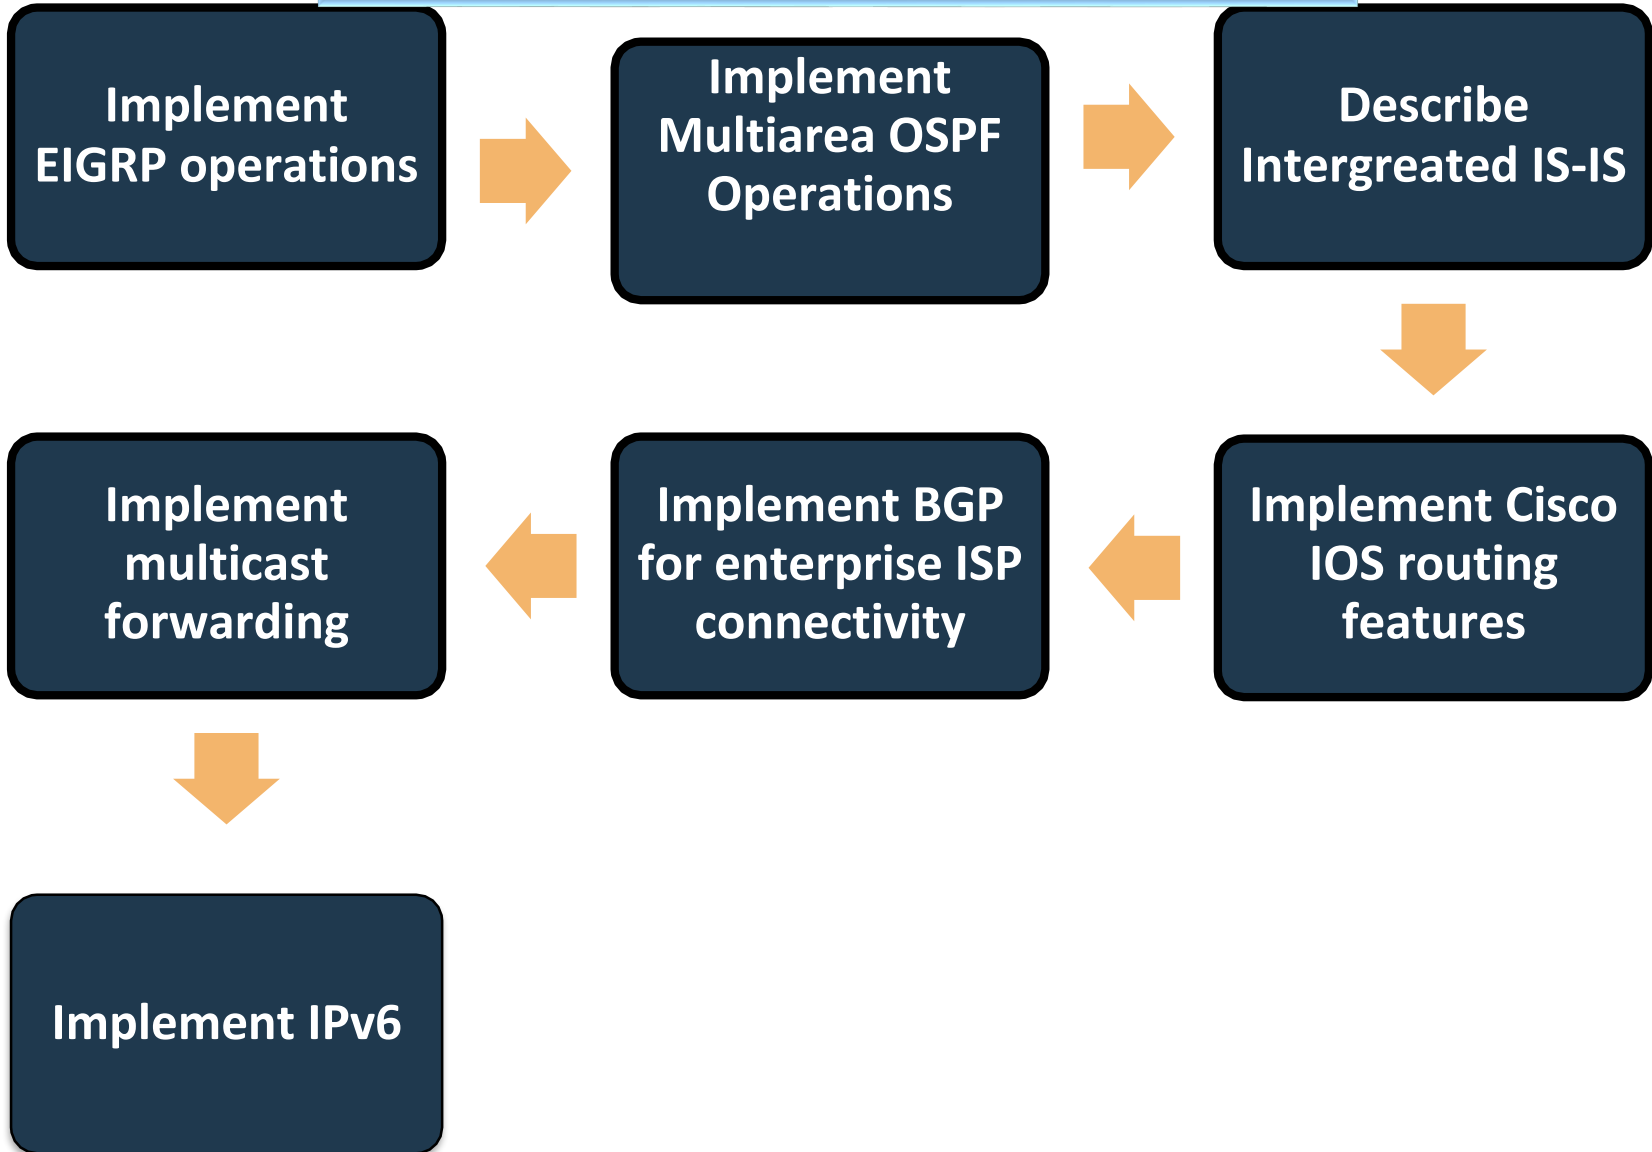

Plan, implement, verify, troubleshoot **local & wide-area enterprise networks** and work collaboratively with specialists on **advanced security, voice, wireless and video solutions**

Having a CCNP certification certainly indicates a level of seniority in the mastery of switching & routing.

Master the advanced concepts of **IP addressing and routing in a LAN or WAN environment**

Learn the concepts for configuring various network monitoring options ,routing and switching technologies

Course Outline

4P Advisory Services

Prerequisites for the EXAM

Valid Cisco CCNA Routing and Switching certification or any Cisco CCIE certification can act as a prerequisite

Exam Details

Exam Registration & Details: <https://www.cisco.com/c/en/us/training-events/training-certifications/certifications/professional/ccnp-routing-switching.html>

Participants upon successfully completion of the CCNP training can opt to take ROUTE 642-902, SWITCH 642-813, and TSHOOT 642-832 exams to complete the requirements for the CCNP Routing and Switching Certification.

Following are the individual exam details:

ROUTE (642-902) – 120 minutes (45 – 55 Questions)

SWITCH (642-813) – 120 minutes (35 – 45 Questions)

TSHOOT (642-832) – 135 minutes (35 – 40 Questions)
