

# CompTIA Server+

CompTIA Server+ certified candidates can work in any environment because it is the only vendor-neutral certification covering the major server platforms. It is the only industry certification that covers the latest server technologies including virtualization, security and network-attached storage. CompTIA Server+ certification validates the skills necessary to be a server administrator. Successful candidates will have mastered the following concepts: Virtualization, Storage, Security, Troubleshooting. CompTIA Server+ certified technicians are skilled in disaster recovery procedures, backups, and restorations, can deploy and upgrade system hardware and storage devices.
