ISO 27001:2013 Lead Implementer

The International Standard ISO/IEC 27001:2013 has been prepared to provide requirements for establishing, implementing, maintaining and continually improving an information security management system. The adoption of an information security management system is a strategic decision for an organization. The establishment and implementation of an organization's information security management system is influenced by the organization's needs and objectives, security requirements, the organizational processes used and the size and structure of the organization. All of these influencing factors are expected to change over time.

case and a project plan for the implementation of an ISMS Preliminary analysis and establishment of the level of the maturity level of an existing information security management system based on ISO 21827

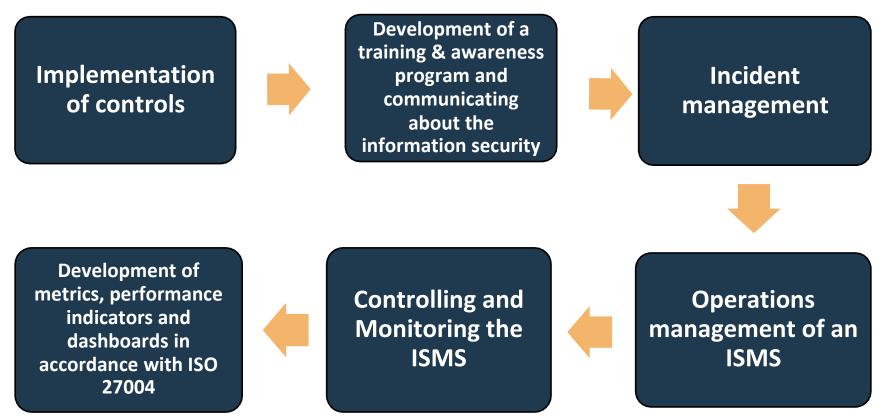

Defining the scope of an ISMS

Development of an ISMS and information security policies Selection of the approach and methodology for risk assessment Risk management: identification, analysis and treatment of risk

Design of controls and writing procedures Implementation of a document management framework

•

Drafting the Statement of Applicability

ISO/IEC 27001 internal Audit

Management review of an ISMS

Preparing for an ISO/IEC 27001 certification audit

Implementation of a continual improvement program

Prerequisites for the EXAM

• None

Exam Details

Optional External Examination (INR. 3,024+GST per participant)

- Total Questions : 60 (MCQs)
- Passing : 60%
- Duration : 180 mins
- This training is based on both theory and practice:
 - Sessions of lectures illustrated with examples based on real cases
 - Review exercises to assist the exam preparation
 - Practice test similar to the certification exam
- This course qualifies for Fourteen (14) CPDs
- Content of the exam
- The "PECB Certified ISO/IEC 27001 Foundation" exam fully meets the requirements of the PECB Examination Certification Programme (ECP). The exam covers the following competence domains:
 - Domain 1: Fundamental information security principles and concepts
 - Domain 2: Planning an ISMS based on PECB Certified ISO/IEC 27001
 - Domain 3: Implementing an ISMS based on PECB Certified ISO/IEC 27001
 Domain 4: Information security control best practices, based on ISO 27002
 - Domain 4: Information security control best practices, based on ISO 27002
 Domain 5: Performance evaluation, monitoring and measurement of an ISMS based on PECB Certified ISO/IEC 27001
 - Domain 6: Continuous improvement of an ISMS based on PECB Certified ISOIEC 27001
 - Domain 7: Preparing for an ISMS certification audit
